DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Martis [US 5,252,144].

Martis discloses a filter comprising an inductor having a core that consists essentially of an Fe-base amorphous metal alloy ribbon and has a substantially constant permeability over a frequency range about 1 to 1000kHz [figure 10].

Claims 1, 4-5, 7-8 and 11 are rejected under 35 U.S.C. 102(b) as being anticipated by Yoshihito et al. [UK 2,138,215 A].

Yoshihito et al. discloses a filter comprising an inductor having a core that consists essentially of an Fe-base amorphous metal alloy ribbon and has a substantially constant permeability over a frequency range about 1 to 1000kHz and a field strength range of approximately –15 to +15 Oe [figures 5-6 and 8].

Claim 1, 4-5, 7-8 and 11-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Petzold et al. [WO99/45643].

Petzold et al. discloses discloses a filter comprising an inductor having a core that consists essentially of an Fe-base amorphous metal alloy ribbon and has a substantially constant

permeability over a frequency range about 1 to 1000kHz and a field strength range of approximately -15 to +15 Oe [figures 3 & 5].

Regarding claim 12, Petzold et al. discloses the core having a permeability in a range of 400 to 1000 over a frequency range of 1 to 1000kHz [figure 5].

Response to Arguments

Applicant's arguments with respect to claims 1, 4-5, 7-8 and 11-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to TUYEN T. NGUYEN whose telephone number is 571-272-1996. The examiner can normally be reached on M-F 8:30-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, ELVIN ENAD can be reached on 571-272-1990. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
